

William H. Eagle

✉ will_eagle@utexas.edu 📍 Austin, Texas

Education

University of Texas at Austin, Bureau of Economic Geology, Geosciences	Austin, Texas
My undergraduate thesis focused on using tree rings in contrasting hydrogeologic settings to evaluate groundwater flow paths and optimize paleo-drought reconstructions. I found that perennially spring-fed trees underestimated droughts, and ephemerally spring-fed trees underestimated wet periods.	2022 – 2026

Experience

UT Austin, Bureau of Economic Geology, Postbaccalaureate Researcher (RSA1)	Austin, Texas
Assisted with instruction of Field Hydrogeology Course	2026 – present 1 year
UT Austin, Bureau of Economic Geology, Undergraduate Research Assistant	Austin, Texas
- Hydrologic monitoring. Tested and deployed sensors and HOBO data loggers for hydrologic monitoring across central Texas. - Radon in water. Standardized methods and evaluated applications of radon as a geochemical tracer of SW/GW interaction. - Hydrogeologic mapping and subsurface characterization. Leveraged geologic mapping and downhole logging to characterize hydrogeologic systems.	2023 – 2026 3 years
UT Austin, Jackson School of Geosciences, Undergraduate Research Assistant	Austin, Texas
- Paleoclimate Cave Monitoring. Monthly monitoring of 4 caves in the Texas Hill Country. Collected dripwater, plate calcite, and atmospheric parameters. Analysis of major ions, and trace elements. - Urban Hydrosociences water quality monitoring. Sampling of stream water in 3 watersheds around Austin. Analysis of major ions, and trace elements. - Project CRESSLE. Sampling of stream water to investigate environmental justice issues in Austin.	2023 – 2026 3 years

Volunteer

UT Student Government, Longhorn Legislative Aid, Representative, Sustainability Caucus Chair	Austin, Texas
	2022 – 2026
Undergraduate Geological Society, Member, Officer	Austin, Texas
	2022 – 2026

Awards

Udall Undergraduate Scholarship	2024
The Scholarship Program identifies future leaders in environmental, Tribal public policy, and health care fields. It is highly competitive, with students participating in their schools' internal competitions before receiving consideration from the Udall Foundation.	
Udall Foundation www.udall.gov	
Groundwater Field Methods, Outstanding Undergraduate Student	2025
Awarded for outstanding scientific achievement.	
UT Austin	

Publications

Reconstructing Climate Change in the Pedernales River Basin

Presented at GSA Connects 2025, Texas Water Resources Network, Texas Climate Conference, and Jackson School of Geosciences Research Symposium.
